Professional Summary

UX/UI Designer with 6+ years of experience designing digital products across Healthcare AI and Enterprise SaaS. Skilled in translating complex user needs, business requirements and workflows into intuitive digital experiences. Experienced in UX/UI design, prototyping, design systems and cross-functional collaboration with PMs, developers and domain experts.

Core Skills:

UX/UI Design: UX Design · UI Design · Interaction Design · Visual Interface Design · Information Architecture · User Flows · Prototyping
Research & Validation: User Research · User Interviews · Workflow Analysis · Customer Journey Mapping · Usability Testing · Accessibility
Design Systems: Design Systems · Component Libraries · Interaction Patterns · Component-based Design · Design Documentation · Design Token
AI & Digital Products: AI-assisted Design · AI UX · Healthcare Technology · Enterprise SaaS · B2B Products· Complex Workflows
Collaboration & Delivery: Stakeholder Management · Cross-functional Collaboration · Developer Collaboration · Design Handoff
Tools: Figma · Figma Make · Google Stitch · Codex · Framer · Sketch · Axure RP

Work Experience

Yuanmeng Information Technology Co., Ltd
UX/UI Designer | Aug 2023 – May 2026

- Led end-to-end UX/UI design for a cross-border logistics and supply chain SaaS platform, covering procurement, inventory management and complex operational workflows.
- Conducted workflow analysis, stakeholder discussions and user discovery to understand business requirements, operational processes and user pain points.
- Translated complex business requirements into information architecture, user flows, interaction patterns and intuitive digital interfaces.
- Created wireframes, high-fidelity UI designs and interactive prototypes, iterating designs based on stakeholder and product team feedback.
- Designed multilingual digital experiences across different regions, user roles and business scenarios.
- Built reusable components and interaction patterns to improve product consistency and support scalable development.
- Collaborated closely with PMs and developers throughout design handoff, implementation and design QA.
- Designed AI-supported replenishment and recommendation experiences to support procurement and inventory decisions.

Aiyunji Information Technology Co., Ltd
UX/UI Designer | Apr 2019 – May 2022

- Designed AI-assisted prenatal ultrasound workflows supporting image review, clinical assessment and decision-making for physicians and sonographers.
- Analysed clinical workflows, operational constraints and usability challenges to understand healthcare professionals' needs.
- Translated clinical workflows and AI capabilities into interaction flows and interfaces across web, desktop and medical-device environments.
- Designed experiences for AI-generated findings, result review, explanations and human confirmation, keeping clinicians in control of final decisions.

- Collaborated with product managers, engineers and clinical stakeholders to align user needs, product requirements and technical constraints.
- Established reusable design patterns, components and interaction standards to improve consistency across the product.
- Created high-fidelity prototypes, interaction specifications and design documentation to support implementation, testing and validation.

KV Focus Leather Goods Ltd.
Production Coordinator | 2015 – 2018

- Managed end-to-end order coordination for international fashion clients, including Weekend Max Mara, with a focus on the Pasticcino Bag collection.
- Coordinated materials, costing, samples, purchase orders, production, quality inspection and shipping across international orders.
- Worked closely with customers, suppliers and factories to align product requirements, pricing, production timelines and quality expectations.
- Coordinated orders for Saben, a New Zealand premium accessories brand.

Shenzhen Diexun Technology Co., Ltd. (蝶讯网)
Fashion Trend Analyst — Part-time | 2014 – 2018

- Researched seasonal fashion trends and consumer preferences across men's and women's fashion categories.
- Analysed styles, silhouettes, colours, materials, accessories and product details to identify emerging market trends.
- Translated trend research into structured visual reports and insights for fashion industry clients.

Education

Bachelor of Arts in Design
Jilin University Zhuhai College | 2010 – 2014
